

## WATERPROOF ENCLOSURES

# Requirement of a Thermoplastic Enclosure for Industrial Application

**saipwell**  
Deliver Happiness to Everyone

Industrial standard thermoplastic enclosures are suitable for housing electrical and electronics of up to 1000V. The thermoplastic enclosures should be able to provide:

## 1. Protection for the User from Electrical Shock Protection.

The electrical insulating capability of a plastic material is measured by the dielectric strength measured in kilo-volt per milli-meter (kV/mm). Dielectric strength is defined by the maximum voltage required to cause a dielectric breakdown.

A thermoplastic enclosure has 2 layers of electrical insulating (double-insulation) protection:

- The cover of the enclosure which is made of insulating thermoplastic material.
- The air distance between the thermoplastic cover and the electrical switching device e.g. contactor which can caused arcing when switching high current. The arc can cause a "flash-over" through the air layer and the thermoplastic cover prevents the human operator from being electrocuted by the arc.

## 2. Protection against natural environment from Dust & Damp (IP)

The thermoplastic enclosure which housed the electrical equipment housed must be available to prevent dust and liquid from entering the housing. The dust and damp can cause electrical short circuit to the electrical equipment. The Index of Protection (IP) as according to IEC529 / EN60529 refers to the level of dust/damp protection to indicate whether the enclosure is suitable for indoor or outdoor application.

## 3. Protection against Mechanical Impact (IK).

The thermoplastic enclosure must also provide sufficient mechanical protection for the electrical equipment. The protection against mechanical impact is measured by the (IK) as according to EN5012.

## 4. Protection against Fire.

- The thermoplastic enclosure should be flame retardant / self-extinguishing. The plastic should "self-extinguish" within a short time when the flame is no longer present. The standard for self-extinguishing is UL94.
- The thermoplastic enclosure should be halogen-free. During a fire, certain plastic material containing halogen elements (fluorine, chlorine, bromine, iodine and astat) may release substances that are toxic to humans in the form of toxic fumes.

## 5. Protection against Hot and Cold Temperature.

The control panel needed to be operated in very hot temperature e.g. hot desert environment or very cold environment. Hence the thermoplastic enclosure must be able to withstand extreme temperature.

## 6. Protection against Chemical Corrosion.

Plastic corrosion occurs when bonds between the organic molecules making up the structure are affected by various corrosive environment caused by the presence of chemicals. The corrosion will cause the mechanical and electrical properties to deteriorate.

Chemical Resistance	ABS
Alkalies	++++
Acid	+
Saltish Environment	++
Petroleum	+
Hydraulic Oil	+++++
Solvents	+
Cooling Fluids	++++

Degree of Protection:

+++++ Very good protection    + Poor protection

### Technical Specification of Saipwell ABS Enclosure

Technical Specifications	Junction Box Type DS-AG	Cabinet Type DS-AGS
Enclosure	ABS Grey RAL7035	ABS Grey RAL7035
RoHS Compliance	Yes	Yes
Index of Protection	IP66	IP65
Mechanical Protection	IK10	IK10
Chemical Protection		
Acid (Low concentration)	++++	++++
Alkalies (High concentration)	++++	++++
Hydraulic Oil	+++++	+++++
Cooling Fluid	+++	+++
Alcohol		
Self - extinguishing	UL94 HB40	UL94 HB40

Mounting Dimension  
Mounting screws 4 x M3x8

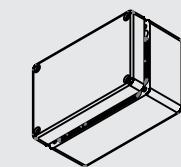

\*Thermoplastic base plate

# Aluminium Die Case Waterproof Boxes

- Aluminum alloy die-casting forming, high temperature resistant, Corrosion-Proof, can be used in harsh environments.
- Applicable: Terminal box, Distribution Box, Instrument Box, Signal Junction Box, Stope, Coastal factories, Sewage Treatment Works and other environments.
- Protection: IP66

Part Number 9SW-MAL-FA2-3	Hole opening on cover Ø16mm	Hole opening on cover Ø22mm	Value-Added Variances
Box outer dimension: 125 x 80 x 58mm	1	-	9SW-MAL-FA2-3-116
Mounting holes distances: 112.5 x 51.3mm	-	1	9SW-MAL-FA2-3-122
